View screen (mobile and minimal UI (6 points))

Get and Post users and songs to a nosql database (still need password hashing!):

The image displays two side-by-side screenshots of a REST client interface, likely Postman, showing API requests and responses.

Left Screenshot (GET /api/song):

- Method:** GET
- URL:** http://localhost:3000/api/song
- Authorization:** No Auth
- Body:** Pretty view showing a JSON array with one object:

```
[
  {
    "_id": "583bc9c45bf802cd8850c9a",
    "title": "mySong",
    "author": "andyAuthor",
    "body": "[C] LALALALA [G] THIS IS A SONG",
    "createDate": "today"
  }
]
```

Right Screenshot (GET /api/usr):

- Method:** GET
- URL:** http://localhost:3000/api/usr
- Authorization:** No Auth
- Body:** Pretty view showing a JSON array with one object:

```
[
  {
    "_id": "583bc32771f96a12a491c0af",
    "userName": "bob",
    "password": "jones"
  }
]
```

Total Points:

Partly implemented third party auth	1
Start page with "about"	2
Public chord sheets	2
Chord sheet + metadata	4
Mobile+ desktop	3
Minimal UI for full screen (need to press f11)	4 bonus ish
Text area for edit with save and clear	2
Modular code	1+1bonus
9 site wide chords	1
Username+password auth	2
TOTAL	23
